

## SMALL STEPS, BIG IMPACT

**P**ROJECT Sunshine has been around since 2002 helping the slum children to get a better life and a bright future. It started with a handful and now takes care of 267 kids. It provides all basic needs to them like food, education, clothes, sports and other extra curricular activities. They are given a safe space to spend their day where they can read books, play games or just learn about the world around via access to the computers. There are many who have talent and just needed a platform to bring it out, so they have reached state level competition in sports like boxing, table tennis and hockey and many others are winning medals in academic fields at inter school level.

Many of them, who have grown up and flown the nest, have achieved great heights like joining the Army, working in national and international companies, becoming a choreographer or a yoga teacher. These kids belong to different faiths and spend time together here as one big family.

COVID times have been tough for everyone, but these kids more so due to their background. The Project made sure that they continue to get food,

medicines, soaps and sanitizers and all their needs were met while following the guidelines of social distancing and hygiene. They have had a regular supply of dry rations as well as cooked food. Kuku and Priti Arora along with their dedicated team continue to provide these kids even in these unprecedented times.

Plot-5, Kehar Singh Estate, Saidulajab, New Delhi-110030.
